(54) Title: COW BREAST HEATING SYSTEM TO INCREASE LACTATION AND DISINFECTION

(57) Abstract: This invention presents an automatic adjusting system which adjusts the cow breast temperature and prevents decrease of lactation of these animals due to coldness or latent illnesses. Using this device increase amount of lactation up to 15%. The pressure sensor installed on this system announces time of breast feeding. More ever, this heating system adjusts the temperature of breast and reduces its breast feeding time. Above all, it protects the animal from being damaged or contaminated in the livestock
